- Utilities: County Water & Sewer 1,200 linear ft away

PRICE: \$8,200,000

PROPERTY HIGHLIGHTS

Positioned at the epicenter of one of Florida's most dynamic growth stories, this 48 acre property represents a rare opportunity to own land in a market that is actively being reshaped by billions of dollars in public and private investment. The city of St. Cloud currently shows 33 active infrastructure initiatives, including road extensions, more than 200 public development applications, and the 560 fully entitled lots going in just to the north with Highland Homes, D.R. Horton, and KB Homes already selling strong. This level of pipeline activity signals sustained demand for land, not a one-cycle spike. The site offers convenient access south of Hickory Tree Road with frontage on Lake Gentry Road, a short drive to the Alligator chain of lakes, and proximity to Lake Nona, Harmony, and downtown St. Cloud. The Florida Turnpike, US-192, and Narcoossee Road provide regional connectivity.

Growth in the Cloud: Long overshadowed, St. Cloud is quickly becoming a centerpiece of Central Florida's momentum.

By: Riley Benson | March 26, 2026 | Orlando Business Journal

St. Cloud is rapidly becoming a focal point of Central Florida's growth as thousands of new homes, master-planned communities and expanding commercial projects reshape the Osceola County city. Osceola County has become one of the fastest-growing local regions, with its population increasing 70% over the past two decades. New construction is an important driver of the local economy, generating both temporary and permanent jobs and bringing new homes into the market to support a growing population.
